INTER-CITIC MINERALS INC.
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THIRD QUARTER ENDED AUGUST 31, 2007

1. Nature of Operations and Basis of Presentation

Inter-Citic Minerals Inc. (the "Company"), is a development stage company engaged in the acquisition, exploration and development of exploration-stage mineral properties. The Company has entered into joint venture agreements to acquire two exploration properties, the Dachang Gold Project in the Province of Qinghai, and the Zalantun Gold Project in the Inner Mongolia Autonomous Region, in the People's Republic of China ("China" or the "PRC"). To date the Company has not found any proven reserves or engaged in any production on any of its properties, and there is no guarantee that this will occur in the future.

These financial statements have been prepared using Canadian generally accepted accounting principles ("Canadian GAAP") applicable to a going concern, which assumes continuity of operations and realization of assets and settlement of liabilities in the normal course of business. However, the Company is in the development stage and is subject to the risks and challenges similar to other companies in a comparable stage of development. These risks include, but are not limited to, dependence on key individuals, successful development and the ability to secure adequate financing to meet the minimum capital required to successfully develop economically recoverable reserves, complete the project and continue as a going concern.

There is no assurance that these initiatives will be successful and as a result there may be substantial doubt regarding the going concern assumption. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption inappropriate. These adjustments could be material.

2. Summary of Significant Accounting Policies

Principles of Consolidation

These consolidated financial statements include the accounts of the Company and its subsidiaries as follows:

- (a) Inter-Citic Holdings Ltd. (100% owned), a company incorporated in the Cayman Islands
- (b) Techmat Inc. (100% owned), a company incorporated in the Republic of Mauritius
- (c) TechMat (USA) Corporation (100% owned), a company incorporated in Nevada, USA
- (d) Bay Roberts Resources Ltd. (98% owned), a company incorporated in British Columbia, Canada

All material inter-company transactions and balances have been eliminated.

The consolidated financial statements of the Company have been prepared by management in accordance with Canadian generally accepted accounting principles. The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses and the disclosure of contingent liabilities as at the date of the consolidated financial statements. Actual results could differ from those estimates.

Foreign Currency Translation

All of the Company's balances and transactions are translated into the Company's measurement currency, the Canadian dollar, as follows. Monetary assets and liabilities are translated at the exchange rates in effect at the balance sheet dates; non-monetary assets and liabilities are translated at rates prevailing at the respective transaction dates. Revenues and expenses are translated at average rates prevailing during the year, except for depreciation and amortization related to assets, which are translated at historical exchange rates. Translation gains and losses are reflected in the consolidated statements of operations and deficit.

Cash and Cash Equivalents

Cash and cash equivalents comprise cash, term deposits and other interest bearing instruments with original maturity dates of less than 90 days.

INTER-CITIC MINERALS INC.
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THIRD QUARTER ENDED AUGUST 31, 2007

Financial Instruments, Hedges and Comprehensive Income

The Company's financial instruments consist of cash and cash equivalents, amounts receivable, restricted cash, investments, and accounts payable and accrued liabilities. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments and the fair value of these financial instruments, unless otherwise noted, approximates their carrying values due to their short term nature. The Company has adopted CICA 3855, Financial Instruments – Recognition and Measurement, CICA 3865, Hedges, and CICA 1530, Comprehensive Income, effective December 1, 2006. These changes were adopted on a prospective basis with no restatement of prior years' financial statements. Adoption of these new accounting policies did not have any significant impact on the consolidated financial statements of the Company.

Resource Properties

The Company considers its exploration costs to have the characteristics of property, plant and equipment. Costs associated with acquisition, direct exploration and development of resource properties are capitalized pending commencement of production, at which time they will be amortized. If capitalized expenditures on individual resource properties exceed the estimated net recoverable amount, the properties are written down to the estimated fair value. Costs relating to properties abandoned are written off when the decision to abandon is made.

The Company is in the process of exploring its property interests. Amounts reflected in the financial statements reflect cost to date and may not represent future value to the Company. No mineral reserves have been determined to exist on these properties. Therefore, the recoverability of the amounts reflected is dependent on future successful exploration and development of the properties.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost less depreciation and amortization calculated as follows:

Leasehold improvements	Three years, straight-line
Buildings	5% reducing-balance
Equipment	10%-33% reducing-balance
Exploration equipment	20%-30% reducing-balance

Income Taxes

Future income tax assets and liabilities are established where the accounting net book value of assets and liabilities differs from the corresponding tax basis. The benefit of future income tax assets is only recognized where their realization is judged to be more likely than not. Future income taxes are recognized for the future income tax consequences attributable to differences between the carrying values of assets and liabilities and their respective income tax bases. Future income tax liabilities are measured using substantively enacted income tax rates expected to apply to taxable income in the years in which temporary differences are expected to be recovered or settled. The effect on future income tax liabilities of a change in rates is included in the period that includes the date of substantive enactment.

Stock-based Compensation Plan

The Company has one stock-based compensation plan, which is described in **Note 9 (d)**. The Company accounts for stock-based compensation in accordance with CICA 3870 (Stock-based Compensation and Other Stock-based Payments) and has chosen to recognize stock-based compensation based on the fair value method of accounting. Under this method, the fair value of stock-based compensation is determined based on the Black-Scholes valuation model and is recognized based on vesting of options granted under the stock option plan. Amounts recognized are credited to Contributed Surplus. Consideration paid on exercise of stock options is credited to Share Capital.

Per Share Amounts

Net loss per share has been computed by dividing net loss applicable to common shareholders by the weighted-average number of common shares outstanding during the respective periods.
